

**TUSTIN UNIFIED SCHOOL DISTRICT
GOVERNING BOARD MEMBER**

JIM S. WALTERS

AGE: 43

OCCUPATION: Chief Technology Officer, Project & Construction
Manager, Businessman, Involved TUSD Parent

As a resident and homeowner living in the unincorporated area of Tustin for over 20 years, I have actively participated in my children's education and will provide strong conservative leadership for Tustin schools as we fill an open seat on our school board.

We must continue to focus on the basics - excellent teachers, conservative fiscal policies, high student achievement, teaching fundamentals, safe schools, modernizing facilities, maintaining class size reductions.

We need strong oversight over Measure G expenditures due to soaring costs. State budget challenges require careful planning as we meet higher achievement standards.

As a father of two TUSD students and husband of a long-time PTO officer, I am strongly committed to assuring our community the quality schools it deserves.

A businessman and Chief Technology Officer for a large engineering company, I have contributed to TUSD for years by participating in school board meetings, every meeting of the Measure G Oversight Committee, and serving on various vocational, education, facilities, and technology committees.

With business and technology experience and strong community involvement, I am well prepared to protect our communities, our children's education and home values by assuring continued excellence in our schools.
